Objectives

Upon the completion of this seminar, the participants will be able to:

- Assess when to switch to an advanced mode when conventional mechanical ventilation is not effective.
- Effectively wean patients on mechanical ventilation while on PMV.
- Perform spontaneous breathing trials for adult mechanical ventilation.
- Determine effective ventilator strategies post lung resection.
- Understand the value of monitoring the neurological status of sedated patients on mechanical ventilation.
- Describe the benefits of reviewing graphics in Neo-Peds. Identify adjustments in ventilation to improve synchrony and ventilation.
